

# Tired of This?

Looking for the solution?

Global Signals Group is pleased to announce its latest development to the signal industry: The Relay Contact Extraction Tool (ReCET)

## **The ReCET**

- Easily removes locking spring clips from Ansaldo PN series relay base with 1 hand
- Is proven to work great for both #10 and #14 size clips
- Requires no pulling on the wire!
- Breaks the contact between spring clips and the relay base
- Inserts into test slot to de-energize the coil for testing
- Will save you time and money getting a more functional and durable tool for less
- Guaranteed to be a better value than the mustard stick

Our patent pending product was created and designed in San Diego, CA by our small team of engineers and built with signalmen in mind
